Giovanni Faria Giraldeli [he, his]

giovanni.giraldeli@gmail.com - https://www.linkedin.com/in/giovannigiraldeli/ - phone: +351 939514204 - Lisbon, Portugal

Detail-oriented analytics professional with a strong foundation in both data infrastructure and business strategy. Experienced in building scalable, maintainable data pipelines and dimensional models that power self-service analytics and decision-making. Combines technical depth with strong communication skills to align data products with stakeholder needs and deliver meaningful business impact.

EXPERIENCE

Analytics Engineer | Data Engineer @ Dremio

May 2025 – Current | Lisbon, PT

Lakehouse company.

- Reduced the analytics infrastructure monthly cost by 65% without degrading performance by reengineering pipelines and re-scaling resources.
- Improved existing and implemented new data governance best practices.
- Created and managed data ingestion and data modeling pipelines.

Tools: SQL, Dremio, dbt, Data Modeling, ETL, Data Management, Python, Github, AWS, Tableau, Jira

Analytics Engineer @ Upwork

November 2023 – October 2024 | Remote for California, USA

Leading work marketplace. Digital born company.

- Enabled strategic decision-making by delivering high-quality data products via dimensional modeling, robust data pipelines, and data quality tests.
- Uncovered opportunities to raise payments take rate by 1–2 p.p. through data modeling, directly impacting revenue growth.

Tools: SQL, Snowflake, Data Modeling, ETL, Data Cleansing, Python, Machine Learning, Looker, LookML, Github, Jira, Airflow

Senior Data Analyst | Analytics Engineer @ QuintoAndar

June 2021 – June 2023 | Remote for São Paulo, BR

Largest Real Estate company in Latin America. Digital born company.

- Empowered business stakeholders with actionable insights through dimensional data modeling, self-service BI and A/B testing to drive strategic decisions.
- Cut real estate financing operational costs by 30% through data analysis focused on efficiency improvements.
- Pinpointed critical NPS factors using ML-driven analysis, prompting strategic team adjustments.
- Launched a disruptive financing product by analyzing ML-driven risk and eligibility clusters, unlocking two strategic segments.
- Improved bill collection performance by 67% through identification of data quality gaps and implementation of fixes.

Tools: SQL, Data Modeling, Data Cleansing, Metabase, Databricks, Spark, ETL, Looker, LookML, Python, Machine Learning, Data Migration, Github, Jira, Airflow

Product Analyst | Data Analyst @ Itaú Unibanco

September 2018 – June 2021 | São Paulo, SP

Biggest bank in Latin America.

- Increased First Call Resolution by 10 p.p. and improved company NPS by 15 p.p. through data-driven strategies built in collaboration with Customer Experience and Product teams.
- Developed customer analytics framework predicting churn and enhancing profitability.
- Boosted marketing campaign revenue by up to 150% through A/B testing and CRM analytics.

Tools: SQL, SAS, Data Cleansing, Data Modeling, Google Analytics
