Débora Ribeiro Doimo de Campos

Data & Analytics Engineer | Senior Data Specialist

📞 +55 11 97386-9116 | ✉️ drcdoimo@gmail.com | 🔗 linkedin.com/in/deboradoimo | Campinas, Brazil

Professional Summary

Technology professional with over 13 years of experience delivering data-driven solutions across Data Engineering, Analytics, Data Science, and Workflow Automation. Proven expertise in data modeling, SQL transformations, cross-source data integration, and architecting reliable analytical foundations for executive decision-making. Experienced in agile frameworks, cross-functional collaboration, and innovation hubs, with a strong focus on data quality, scalability, and business impact. Holds a Master's degree in Computer Engineering and Databricks Data Engineer Associate certification.

Core Competencies & Technical Skills

- **Programming & Query Languages:** Python, SQL, JavaScript
- **Data Platforms & Warehouses:** Databricks, Google BigQuery, Microsoft SQL Server
- **Engineering & Analytics:** ETL/ELT Pipelines, Data Modeling (Dimensional & Relational), Data Quality, Business Intelligence
- **Automation & Integration:** Make (Integromat), n8n, Bubble
- **Methodologies:** Agile / Scrum, Cross-functional Team Leadership, Requirements Gathering
- **Languages:** English (Advanced/Fluent), Spanish (Advanced/Fluent), Portuguese (Native)

Certifications

- **Databricks Certified Data Engineer Associate**

Professional Experience

Oktopuz Soluções Digitais | *Data & Analytics Engineer*

Feb 2022 – Present

Technology and data consultancy focused on analytics, automation, and operational efficiency.

- Architected and maintained scalable ETL/ELT pipelines, standardizing raw data into analysis-ready repositories.
- Designed analytical data models to power executive dashboards, reporting layers, and business intelligence assets.
- Partnered directly with stakeholders and clients to translate complex business needs into robust technical data architectures.
- Integrated fragmented multi-source data and automated workflows to establish centralized, reliable single-source-of-truth datasets.
- Implemented rigorous data quality and consistency checks to ensure data reliability for high-stakes business decisions.
- **Key Project Highlights:**
    - **Suzano (Forestry Management):** Built an analytical foundation and reporting infrastructure for operational monitoring.
    - **Retail & Marketing:** Developed data pipelines and analytical models to track customer engagement and multi-channel campaign performance.
    - **Entrepreneurial Ecosystem:** Deployed automated workflows and conversational bots integrated with databases and analytical flows.

PUC-Campinas | *Adjunct Postgraduate Lecturer*

Apr 2023 – Apr 2024

- Instructed graduate courses in *NoSQL Databases* and *Introduction to Data Science, Big Data & Analytics*.
- Taught core concepts of modern data modeling, distributed large-scale processing, and foundational analytical architectures.
- Emphasized industry best practices in data governance, hygiene, and efficient information architecture.

beOn Claro (Claro Innovation Hub) | *Analytics Specialist*

Jul 2019 – Feb 2022

- Drove data and analytics initiatives within Claro's corporate innovation hub to validate new business hypotheses and pilots.
- Designed analytical datasets enabling rapid experimentation, metric tracking, and product validation.
- Utilized advanced SQL and data modeling techniques to deliver operational and strategic business insights.
- Provided technical leadership to an agile team developing internal data products and operational tooling.
- Collaborated across multi-functional squads (product, engineering, business) in fast-paced agile environments.

Telefônica Vivo | *Senior Data Scientist*

Oct 2017 – Jun 2018

- Developed end-to-end analytical solutions focused on e-commerce transaction data and customer journey behavior.
- Built automated data extraction, transformation, and ingestion workflows handling large-scale datasets.
- Leveraged Google BigQuery and complex SQL optimizations for high-volume data manipulation.
- **Key Achievement:** Slashed data latency from 24 hours to 2 hours, drastically increasing operational responsiveness and decision velocity.

Previous Experience

- **Siplan Control-M** | *Systems Analyst* (*2015 – 2016*): Requirements gathering, development, and support for enterprise systems.
- **Leega Consultoria** | *BI Consultant* (*2014 – 2015*): Data Warehouse delivery for Nextel telecom operations.
- **Itaú Unibanco** | *Systems Analyst* (*2012 – 2014*): Corporate Data Warehouse development and international system deployment.

Education

- **M.Sc. in Computer Engineering** | *University of São Paulo (EPUSP) — 2017 – 2021*
- **B.S. in Computer Science** | *São Paulo State University (UNESP) — 2008 – 2011*

International Experience

- **Academic & Cultural Exchange** | *Buenos Aires, Argentina* (*Jan 2017 – Jun 2017*)
