# MATEUS MATOS RIZZI

**STAFF DATA ENGINEER | Snowflake • dbt • Power BI • Azure • Kafka • Iceberg • Airflow**

São Paulo, Brazil | (11) 97487-3855 | mateusmrizzi@hotmail.com | linkedin.com/in/mateus-matos-rizzi

| Snowflake | dbt + GX | Power BI | Azure Stack | Staff DE |
|---|---|---|---|---|
| modeling & RBAC | quality & lineage | semantic layer | ADLS · ADF · Databricks | 8+ yrs full-stack |

## PROFILE

Staff Data Engineer with **8+ years of end-to-end experience** architecting and delivering scalable data and reporting platforms. Deep expertise in **Snowflake** (modeling, RBAC, data sharing, performance optimisation), **dbt** (transformations, tests, lineage), **Power BI** (semantic layer design, embedded analytics), and the full **Azure ecosystem** (Databricks, ADLS Gen2, ADF). Proven in bridging upstream data platforms with downstream BI consumption layers using Medallion Architecture (Bronze → Silver → Gold). Experienced with **Kafka/CDC, Apache Iceberg, Apache Airflow** and **REST/GraphQL APIs** for data product delivery. Track record of **mentoring engineers**, driving data governance standards, and collaborating directly with Product, Analytics and Business stakeholders to translate complex requirements into reliable, observable data products. Holds an **MBA in Data Science (USP)**. Fluent in English — daily professional communication with international teams (USA, India). Available 100% remote.

**CORE STACK — DATA & REPORTING PLATFORM**

**Snowflake • dbt • Power BI • Azure (Databricks / ADLS Gen2 / ADF) • Apache Airflow • Kafka / CDC • Apache Iceberg • PySpark • Python • REST / GraphQL APIs • Git / GitHub Actions**

## PROFESSIONAL EXPERIENCE

### AI / Data Tech Lead — Staff Data Engineer | *Coforge (formerly Encora)*

*February 2025 – Present | 100% Remote | International clients (USA, India)*

- **Architected Medallion data lake on Databricks Delta Lake and Azure (ADLS Gen2 / ADF)** — designing Bronze → Silver → Gold transformation layers with full governance, lineage and quality controls, consumed downstream by Power BI and API-driven reporting products.
- **Designed and implemented scalable dbt data models** on Snowflake and Databricks — building reusable, tested and documented transformations that power reporting dashboards and self-service BI consumption layers.
- **Snowflake platform ownership:** RBAC design, query performance tuning, data sharing configuration and Snowflake monitoring — ensuring trust, transparency and cost efficiency across all data products.
- **Power BI semantic layer design:** structured consumption-layer models optimising Snowflake-to-Power BI reporting — enabling business users with accurate, self-service insights at scale.
- Implemented **data quality and observability frameworks** (dbt tests, data freshness monitors, pipeline alerting via Airflow) — ensuring reliability and auditability of all data presented to end users.
- Built **AI-powered data product features** (LangChain Agents, Text-to-SQL) bridging natural-language queries to Snowflake and reporting layers, reducing time-to-insight for non-technical stakeholders.
- **Mentored 4–6 engineers** in data modeling, Snowflake performance tuning, dbt best practices and BI system design; contributed to architecture reviews and engineering standards.
- Operated with full autonomy across ambiguous, cross-functional environments — aligning Data Platform, Product and Analytics teams on ingestion, conformance and consumption patterns.

### AI / Data Tech Lead — Senior Data Engineer | *Mercado Eletrônico*

*April 2021 – February 2025*

- **Built and operated the company's core dbt + Snowflake analytics platform** — modelling complex B2B marketplace business rules as tested, documented SQL transformations serving Power BI and Looker reporting layers.
- Designed and maintained **GCP data pipelines** (Dataflow, Dataform, Cloud Composer/Airflow) and **Kafka/CDC integrations** for real-time ingestion into the Snowflake consumption layer.
- **Implemented data governance standards** — column-level lineage, dbt documentation, access controls and data quality validation across all reporting pipelines.
- **REST API integrations:** built Python-based APIs and consumed upstream data-sharing endpoints to feed reporting and client-facing data products.
- Resolved a critical production performance issue: identified missing primary keys causing full-table scans, redesigning the extraction strategy and reducing pipeline duration from **4 hours to 1 hour**.
- Led a team of **4–6 data engineers** — mentoring in data modeling, Snowflake performance and BI best practices; translated business requirements into scalable, reliable data solutions.

**Data Engineer** | *Sysvision International*
*February 2020 – March 2021*

- Built **REST/SOAP API integrations** and SAP HANA data pipelines for Bayer (Life Sciences) — delivering enterprise data products across regulated environments.
- Designed and implemented Hadoop/Hive-based data flows and **ADLS-compatible storage patterns** for international client projects.

**Data Engineer** | *ADP*
*June 2019 – January 2020*

- Built and maintained **HR/payroll/benefits data pipelines** using Talend Data Integration and Python — working with Workday HRIS data to deliver reliable reporting and analytics products.
- Automated rule-based financial benefits processing logic, improving pipeline reliability and data accuracy across payroll reporting.

**Data Analyst** | *Deal Group*
*February 2019 – June 2019*

- Designed data flows from SAP HANA to SQL Server using SSIS and Pentaho, building data models for operational reporting.

**BI Intern** | *Gol Airlines*
*September 2018 – February 2019*

- Developed QlikSense dashboards and maintained data integration routines for operational analytics.

## SKILLS & TECHNICAL EXPERTISE

**Data Platform & Modeling**

- Snowflake — modeling, RBAC, data sharing, perf tuning
- dbt — transformations, tests, documentation, lineage
- Great Expectations / dbt tests — data quality frameworks
- Star schema, Medallion Architecture, Iceberg
- Semantic layer design for Power BI / BI consumption

**Programming & APIs**

- Python — 8+ yrs (PySpark, pandas, scripting, automation)

**Cloud & Orchestration**

- Azure — Databricks, ADLS Gen2, ADF (primary cloud)
- Apache Airflow — 6 yrs production orchestration
- Kafka / Debezium — CDC-based ingestion
- Apache Iceberg — table management, time travel
- AWS (Redshift, S3, Glue, Athena) • GCP (BigQuery)

**BI, Governance & Leadership**

- Power BI — semantic models, DAX, embedded analytics
- Looker / Amazon QuickSight
- Data governance, quality, observability

- SQL — advanced (window functions, CTEs, optimisation)
- REST / GraphQL APIs — build & consume
- JavaScript — familiarity
- Git / GitHub Actions CI/CD
- frameworks
- Team mentorship (4–6 engineers)
- Fluent English — international remote teams

## CERTIFICATIONS

**Claude Certified Architect** — Anthropic (Valid: June – December 2026)
**LangChain Agents Certification** — LangChain

## EDUCATION

**MBA in Data Science** — Universidade de São Paulo (USP)
*February 2020 – January 2021*

**B.Eng. in Information Engineering** — Universidade Federal do ABC (UFABC)
*September 2014 – May 2019*
