OLEKSII MINENKO

Senior Machine Learning Engineer/ Senior AI Engineer

Kyiv, Ukraine | collinlikas@gmail.com | +380633327637

WORK EXPERIENCE

DataZ — Machine Learning Engineer

Jan 2025 – Present | Kyiv, Ukraine

• Designing large-scale data and ML pipelines for structured and unstructured OSINT data ingestion and feature extraction.
• Developing and evaluating custom LLM-based classifiers for identity-matching, credit-scoring, and content detection tasks.
• Implementing distributed data processing using PySpark and optimizing model training throughput on AWS infrastructure.
• Building internal evaluation and monitoring frameworks to measure precision/recall and improve model performance over time.
• Collaborating with data engineers to standardize schema design and ensure consistent data quality across pipelines.
• Fine-tuning LLMs and optimizing prompts using automated evaluation pipelines (e.g., MLflow), improving classification quality and consistency across OSINT tasks.

Tech stack: Python, PySpark, Airflow, TensorFlow, Scikit-learn, AWS, Docker, LangChain, OpenAI API, MlFlow, Gemini

CaboodleAI — Machine Learning Engineer

Jan 2020 – Dec 2024 | Remote / Kyiv, Ukraine

• Developed and maintained production-grade ML pipelines for model training, evaluation, and monitoring.
• Built and deployed a personal recommendation system, improving user engagement and conversion metrics.
• Designed and managed Airflow DAGs for automated data ingestion, feature generation, and retraining workflows.
• Integrated data flows from Google Analytics and internal databases, enabling unified tracking and consistent model inputs.
• Supported and optimized existing ML services in production, improving latency and reliability.
• Collaborated with cross-functional teams to align ML outcomes with product and business objectives.

Tech stack: Python, Airflow, TensorFlow, Scikit-learn, PySpark, AWS, Docker, SQL, Google Analytics API

Jiji — Data Scientist

Aug 2018 – Aug 2022 | Kyiv, Ukraine

• Built recommendation systems, traffic control, and anti-fraud models for the online marketplace.
• Developed new features and contributed to model improvements for multiple business lines.

Active Wizards — Data Scientist

Jan 2018 – Aug 2018 | Kyiv, Ukraine

• Conducted exploratory data analysis and built prediction models and R Shiny applications.
• Performed R&D to evaluate new ML methods and modeling techniques.

SynergyOne — Data Scientist

Jul 2017 – Jan 2018 | Kyiv, Ukraine

• Worked on an SME scoring project, developing regression and classification models.
• Designed feature engineering pipelines and implemented clustering algorithms.
• Authored project documentation and contributed to model validation processes.

Ubisoft Ukraine LLC — QC Game Tester

Dec 2016 – Jul 2017 | Kyiv, Ukraine

• Tested game mechanics, created reports, and documented bugs using Jira.

EDUCATION

Taras Shevchenko National University of Kyiv

M.Sc. in Actuarial and Financial Mathematics (2016)

B.Sc. in Mathematics (2014)

SKILLS

Programming & ML: Python, SQL, Scikit-learn, TensorFlow, PySpark
Data Engineering: Airflow, Docker, AWS, Data Wrangling
Machine Learning: Recommender Systems, Classification, LLM Fine-tuning, Model Monitoring
Tools & Libraries: Pandas, NumPy, LangChain, OpenAI API
Other: Statistics, Feature Engineering, CI/CD for ML

LANGUAGES

English – Fluent
Ukrainian – Native

HOBBIES

Personal development, traveling, cooking, and movies.
