DANIEL FOGAÇA

Senior Data Engineer · Analytics Engineer · Data Governance
São Paulo, Brazil (UTC−3) · +55 11 97419-5379 · dani.16115@gmail.com · linkedin.com/in/daniel-fogaca
Available for fully remote engagement (contractor / EOR) — full overlap with US business hours

PROFESSIONAL SUMMARY

Data professional with 10+ years across Analytics, Data Engineering, Data Science and Data Governance in healthcare, insurance, credit, FX and technology. Designs, builds and operates production data platforms on Snowflake, Databricks and AWS/Azure, orchestrating pipelines with Apache Airflow and Matillion in Python, PySpark and SQL. Currently leads a distributed offshore engineering team at IQVIA, running client-facing service reviews in English and providing hands-on incident resolution on the underlying data warehouse. Track record in feature engineering for credit-scoring models, ML deployment and monitoring, and standing up data governance programs aligned to DMBOK and LGPD.

TECHNICAL SKILLS

Languages & Libraries: Python, PySpark, SQL (ANSI SQL, T-SQL, PL/SQL), Pandas, NumPy, scikit-learn, Matplotlib, Seaborn

Data Engineering & Orchestration: Apache Airflow, Matillion, SSIS, SAS, ETL/ELT design, pipeline automation, data modeling

Platforms & Warehouses: Snowflake, Databricks, Amazon Redshift, Cloudera Data Science Workbench, Teradata

Cloud: Amazon Web Services (AWS), Microsoft Azure

Databases: Oracle, SQL Server, MongoDB

Machine Learning: Feature engineering, model training and validation, deployment and production monitoring

BI & Visualization: Power BI, QlikView, Qlik Sense

Governance & Compliance: DMBOK framework, LGPD, data quality, data architecture standards

Tooling & Delivery: ServiceNow, Jira, Confluence, Trello, Agile delivery

PROFESSIONAL EXPERIENCE

IQVIA — *Client Services Lead — Data Engineering & Analytics* Dec 2024 – Present

- Provide hands-on operational support for a production Snowflake data warehouse and its analytics pipelines, investigating and resolving incidents in Apache Airflow and Matillion outside offshore-team coverage hours.
- Lead the offshore engineering team, setting priorities, requirements and technical context for incident response.
- Act as focal point between LATAM clients and offshore engineering and operations teams, translating business needs into technical actions.
- Run weekly client reviews in English covering service KPIs, mean time to resolution, ticket volume and SLA performance across LATAM accounts.
- Own ticket triage and prioritization in ServiceNow and drive workflow optimization across the support function.
- Impact: reduced mean time to resolution on critical incidents through technical guidance and hands-on support during out-of-hours windows.

Serasa Experian — *Analytics Engineer* Oct 2022 – Dec 2024

- Built and maintained variable books powering production credit-scoring models across multiple internal and external data sources.
- Assessed new external data sources for feature potential and fit against existing scoring models.
- Measured variable performance and ran experiments driving continuous model improvement.
- Engineered synthetic variables to enrich credit models and strengthen risk decisioning.
- Worked in big-data environments using Python and PySpark on Cloudera Data Science Workbench and Databricks.
- Impact: delivered variable books adopted by production scoring models, strengthening the robustness of the analytical datasets behind credit decisions.

Porto Seguro — *Data Scientist — Health Insurance* Nov 2021 – Oct 2022

- Built and evolved analytical and machine learning models supporting decision-making in the health insurance vertical.
- Structured and automated data pipelines, ensuring quality, availability and scalability of the data feeding those models.
- Led feature engineering work: synthetic variable creation, dataset enrichment and attribute selection to lift model performance.
- Ran data cleansing, preparation, training, validation and evaluation for machine learning and deep learning models.
- Deployed models to production and owned ongoing performance monitoring.

- Partnered with business teams on requirements gathering, rule validation and sign-off of analytical deliverables.
- Built analyses and dashboards in Power BI over AWS Redshift to support business decisions.
- Impact: automations and dashboards reduced rework and accelerated insight delivery to business teams.

Banco Rendimento — *Data Architect* Nov 2020 – Nov 2021

- Designed and proposed a new enterprise data architecture for Big Data and Data Science in a hybrid on-premise/cloud environment.
- Established the Data Governance function from scratch, aligned to the DMBOK framework and LGPD (Brazilian GDPR-equivalent) requirements.
- Evaluated emerging technologies and ran proofs of concept with vendors to inform platform decisions.
- Impact: governance standards and practices adopted across the organization, reducing rework in data solution development.

Bradesco Seguros — *Data Analyst* Apr 2018 – Nov 2020

- Built and automated data pipelines and dashboards supporting business areas across the insurance operation.
- Combined hands-on delivery with management of outsourced consultants and developers across new projects and platform support.
- Developed dashboards and KPI visualizations in Power BI and QlikView for business stakeholders.
- Built and automated datasets and ETL processes using SAS, SQL Server, SSIS and Teradata.
- Impact: process automation and analytical solutions that materially reduced manual reporting effort across business areas.

Iteris Consultoria e Software — *BI Consultant — client: Aché Pharmaceuticals* Sep 2016 – Apr 2018

- Supported and evolved corporate QlikView dashboards, delivering new features and improvements for business stakeholders.
- Led a migration replacing Excel-based controls and reports with interactive dashboards, improving automation, performance and data reliability.
- Extracted and transformed data in SQL Server and validated results against SSAS analytical cubes.
- Impact: delivered dashboards supporting strategic decisions across multiple business areas at a leading Brazilian pharmaceutical company.

SELECTED PROJECTS

- Data Warehouse Support & Pipeline Orchestration — Snowflake + Matillion + Airflow (IQVIA): operational ownership of a production data warehouse and analytics pipelines, covering incident investigation and resolution, data flow monitoring and LATAM client support in an offshore delivery model.
- Credit Score Variable Books (Serasa Experian): built and maintained the feature libraries feeding production credit-score models, including feature engineering, new data source evaluation and performance testing to improve model robustness.
- Industrial & Quality Analytics (Raízen): developed and maintained dashboards for Industry and Quality functions, extending operational visibility and supporting Market Intelligence, Marketing and Sales teams.

EDUCATION & LANGUAGES

B.S. in Information Systems — Faculdade Impacta de Tecnologia, São Paulo, Brazil (2017)

Portuguese (native) · English (advanced — full professional working proficiency; daily client-facing use)

CERTIFICATIONS

- Microsoft Certified: Azure Data Engineer Associate
- Microsoft Certified: Azure Data Scientist Associate
- Microsoft Certified: Power BI Data Analyst Associate
- Microsoft Certified: Azure Fundamentals
- Oracle Database SQL Certified Expert
- Building a Data Warehouse Using Matillion
- ANBIMA CPA-20 (Brazilian financial markets certification)
