Skills

Languages and Frameworks

- Python
- FastAPI
- Django
- Flask
- SQL
- Shell script
- Groovy

Infrastructure and DevOps

- Docker
- Nginx
- Kubernetes
- Terraform
- Jenkins
- Github Actions
- Linux
- CI/CD

Databases

- PostgreSQL
- MySQL
- MongoDB
- Redis

Monitoring

- DataDog
- ElasticAPM
- Splunk
- Prometheus
- Grafana

Cloud Services

- AWS
- Digital Ocean

Profile

Senior Backend Engineer with 13+ years of experience building and scaling Python-based systems (Django, FastAPI) for SaaS, fintech, logistics, and healthcare platforms. Strong track record designing high-throughput APIs, distributed workflows, and automation solutions that reduced operational effort and delivered measurable business impact. Experienced in PostgreSQL optimization, cloud infrastructure (AWS), and CI/CD, with a background leading teams and delivering production-critical systems for large-scale operations in Brazil and the US.

Work Experience

Senior Software Engineer — 2025 – Now

Thoughtful AI - Austin, TX (USA)

• Designed and implemented end-to-end automation workflows for two large healthcare clients, eliminating manual processes and significantly reducing operational effort.
• Developed reusable libraries for data extraction, transformation, and standardization, used across 20+ projects to reduce code duplication and centralize maintenance.

Senior Software Engineer — 2023 – 2025

Shipwell - Austin, TX (USA)

• Led the backend design and implementation of an air shipment visibility feature, receiving an internal Golden Star award for impact and execution.
• Designed and delivered a complex feature spanning four microservices, coordinated through feature flags to ensure safe rollout.
• Collaborated cross-functionally with frontend and product teams to deliver end-to-end functionality when needed.

Senior Software Engineer — 2022 - 2023

Stack Tecnologias - Belo Horizonte, MG (Brazil)

• Led a multidisciplinary squad during post-acquisition system integration.
• Redesigned and standardized 50+ API endpoints to ensure seamless and low-friction integration between multiple systems.

Tests

- Unit Tests (Pytest and Unittest)
- Load Tests
- Automated Tests
- Integration Tests

Versioning

- Git
- Github
- Gitlab
- SVN

Concepts

- System Design
- Event Driven Architecture
- Microservices Architecture
- Security
- Parallelism and Concurrency
- RESTful
- Queues
- Caching
- Test Driven Development
- Design Patterns
- Gitflow
- Database modeling
- Relational Databases
- Non-Relational Databases
- Data Structures
- Algorithms

Methodologies

- Scrum
- Kanban

Languages

- Portuguese (Native)
- English - Advanced

Senior Software Engineer 2020- 2021

Juntos somos mais - Belo Horizonte, MG (Brazil)

• Led the design and migration of a legacy C# monolith to an event-driven Python microservices architecture.
• Designed and implemented the Saga pattern to ensure data consistency across distributed services processing 100,000+ requests per day.
• Optimized PostgreSQL infrastructure and Django queries, significantly improving response times and contributing to an estimated 5% increase in sales.

Senior engineer and DevSecOps 2012- 2020

Prodemge - Belo Horizonte, MG (Brazil)

• Trained 300+ developers on Git, configuration management, and CI/CD pipelines (Jenkins), raising overall engineering maturity across the organization.
• Led the migration from a proprietary version control system to Git, generating annual cost savings in the hundreds of thousands of BRL.
• Designed and implemented reusable CI/CD pipeline scripts adopted by 2,000+ projects.
• Automated build, test, and deployment workflows, reducing average deployment time from ~2 hours to ~15 minutes (~87% reduction).

Education

University Cotemig - Belo Horizonte, MG (Brazil)

Bachelor's degree in Information Systems
